

Week 2 Task 2 :

SQL Injection Practice:

Use Damn Vulnerable Web App (DVWA) or bWAPP to test SQL Injection attacks on a test environment.

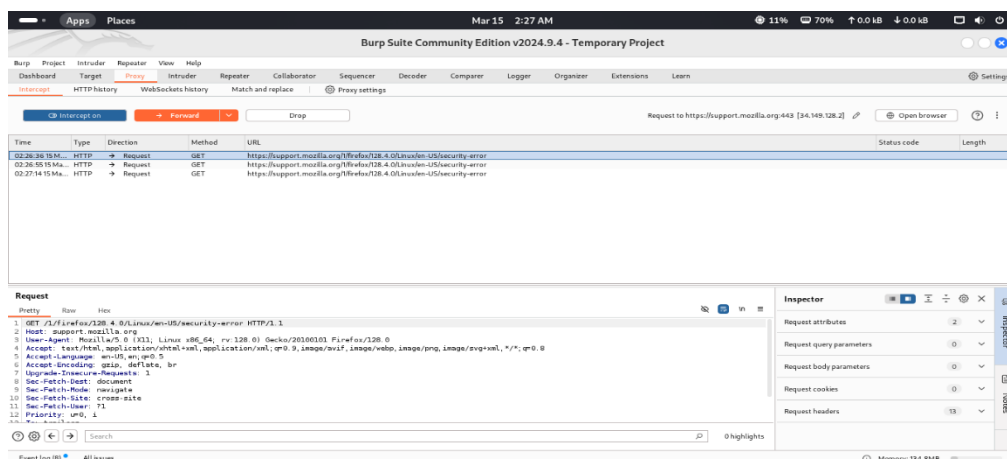

Try using sqlmap to automate SQL Injection detection.

Use Burp Suite for Web Traffic Analysis:

Install and configure Burp Suite Community Edition to intercept HTTP requests.

Capture login credentials of a test site and understand how attackers steal data.

Mini Web Scraping Task:

Write a Python script using BeautifulSoup or Scrapy to scrape public data (like news headlines) from a website.
